

# What are Adobe CS Live online services?

Adobe® CS Live online services integrate with Adobe Creative Suite® software to help accelerate your workflow. Accurately test web content, initiate and manage reviews, create blueprints for video projects, and easily share information.

## Integration with Creative Suite desktop applications

Streamline everyday tasks from within your creative environment. Access Adobe® CS Live online services directly from within certain CS5.5 and CS5 applications.

**Adobe CS Review**  
Simplify the creative review process and gather feedback from clients and colleagues from within certain Adobe® Creative Suite® applications. Save valuable time on virtually any design, print, or video project.

**Acrobat.com**  
Accelerate discussion and information exchange with colleagues and clients. Use a set of online services to collaborate on projects, share files more securely, and communicate online via web conferencing with ConnectNow.

**Adobe Story**  
Create scripts or outlines that serve as blueprints for video productions and other creative narratives. Develop great stories and benefit from integration with Adobe® Premiere® Pro CS5.5 software to streamline your production workflows.

**SiteCatalyst NetAverages**  
View Internet trends of desktop and mobile users, like browser usage and device types, to help you plan and optimize web content for the widest possible audience.

**Business Store**  
Small and medium businesses
