Solar Operations Live View

Live Monitoring of Solar Sites

Asset Management

Secure, Robust Architecture

Visual Displays of Complex Info

Role Based Dashboards

Operations and Alert Management

Intelligent Reporting

Utility-scale solar sites require sophisticated monitoring, reporting and diagnostics capabilities to deliver expected energy production. Swinerton Renewable Energy has leveraged years of solar industry experience to build an industry leading Operations and Maintenance platform to provide our customers with a competitive advantage to maximize production and minimize service costs.

Swinerton offers our Solar Operations Live View (SOLV) platform at no additional annual cost to customers as part of our O&M service contracts. We offer custom integration for each site based on specific site architecture and components to offer unique value, above and beyond industry monitoring solutions.

SOLV was built to leverage advanced technology to support:

- ❑ Asset Managers
- ❑ Operations Managers
- ❑ Service Technicians
- ❑ Financial Analysts
- ❑ Performance Contract Managers
- ❑ Supervisory Controls
