About this font family

The beautiful calligraphic typeface Ambiance comes from master designer Rob Leuschke.

The complete array of characters includes a swash alternate for each upper and lowercase letter. Called contextual alternates in OpenType, the swash characters are automatically substituted in the appropriate context when you select them.

For non-OpenType applications, we offer two supporting fonts, Ambiance Swash, containing all the swash characters, and Ambiance Coalesce, a blend of the swash capitals and the standard lowercase letters.
