PLAYERS

THE RIGHT LIGHT TECHNOLOGY

The Right Light technology achieves the lightest possible weight for a given club while still allowing it to feel solid and balanced. For the D100 driver, The Right Light technology optimizes grip, shaft and head to allow you to swing faster with the same effort. What does that lead to? Faster club head speeds and hotter distances.

ENHANCED CUP FACE DESIGN & VARIABLE FACE THICKNESS

A hotter CT fires the ball with greater speed and distance. Variable thickness in the large, deep face creates an immense sweet spot for more forgiveness on off-center drives.

CHEMICALLY-ETCHED CROWN

Relocating non-essential weight to the sole of the club head lowers and deepens its center of gravity. This heightens the launch angle and increases MOI for forgiveness and more fairways hit.
