All-Around Boards

Touring Boards

## All-Around Boards

Specifically designed for lakes, rivers and streams, Loon All-Around Boards feature a unique double concave bottom that flows

glide and tracking.

All-Arounds are the perfect blend of stability and agility for all skill levels and types of activities.

## Touring Boards

Our Touring Boards are longer and narrower than our All-Arounds and feature a displacement hull. They don't glide or slide on top of the water, instead they slice through the surface resulting in a faster, smoother ride. Their excellent tracking and stability make these boards ideal for leisurely touring, long distances and racing.

All of our touring boards are limiteds, specially crafted for the ultimate paddling experience. Each board is numbered on the bottom and only produced in a limited number.
