TEXT SCOPE

Whatever you write, your first draft is never the last.
Spot changed text quickly and merge instantly.

Screenshots

Whitespace Ignoring:

Compare text in **Blocks**, **Fluid** and **Unified** layouts in both **Two-Way** and **Three-Way** modes. Quickly navigate and search through the **most readable diff** you've ever seen.

UNIFIED LAYOUT

Kaleidoscope offers the best Three-Way merge handling with the **new Unified Layout**. Instead of just showing you text side by side, Unified layout interleaves your possible choices on the left with your final output on the right, providing a concise, readable, and delightful way to merge.

VERSATILE

Compare your files in three different layouts, use **instant search** to find matches in one or both files, and use your keyboard's arrow keys to **quickly jump** from change to change. There are no distractions, but tons of useful features.

- ✓ **Three-Way Merge** intelligently auto-merges the right content
- ✓ Seamlessly switch between three different layouts
- ✓ Pick your **font and color scheme**, with or without wrapping
- ✓ Powerful search and navigation features
- ✓ Did we mention it's **blazing fast**?
- ✓ Now with **Whitespace Ignoring**

Spot the Differences

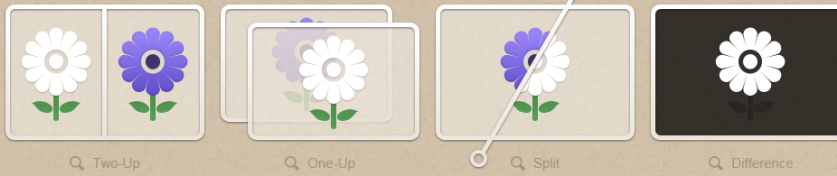

IMAGE SCOPE

TOP ↑

Four Layouts

Spot the smallest retouch, that 2 pixel nudge and the slightest color change in a heartbeat.

Incredibly Fast

With four different layouts and exceptional performance, Kaleidoscope makes reviewing image files that much easier and quicker.

Screenshots

- ✓ Perfect for [photographers, retouchers and designers](#)
- ✓ Did we mention it's [super snappy?](#)

SPOT ON

The human eye is really good at spotting differences, but sometimes it can use [a little help](#). Each layout aids the eye [in a different way](#), to help you quickly spot anything, from the smallest retouch to image-wide color changes.

RESPONSIVE

Simply put, the image scope is [really fast!](#) Scrolling and zooming is always responsive, whether you use [multi-touch gestures](#) or your mouse and keyboard. Try it once and you'll wonder why you ever settled for less.

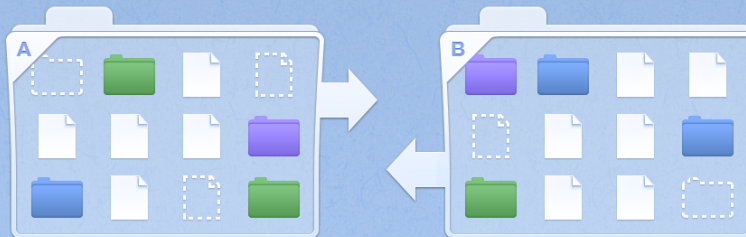

Information at a Glance

TOP ↑

FOLDER SCOPE

Kaleidoscope does folders, too! Compare [two different directories](#) side-by-side, [clone files](#) from one to the other, and double click any pair of files or folders to compare them.

FAST

Folder Scope uses an [ultra-fast](#), multi-pass algorithm to find and show differences to you quicker than ever. Spend more time [examining and exploring](#) your files, not waiting for a comparison to finish.

PRECISE

Whether it's a music collection or branches of code, folders can have a lot of differences. Folder Scope makes it [easy to filter](#) for what you are looking for and drill down to see more. Double click a folder to open a new tab and filter it to see any combination of changes, additions, and deletions.

With powerful data filtering and **exceptional performance**, Kaleidoscope makes reviewing differences in files & folders **easier than ever**.

Screenshots

- ✓ Ultra-fast algorithm for finding differences in large folders
- ✓ Sort and filter down to what [matters most](#)
- ✓ Drill deeper into folders for more detailed comparisons
- ✓ Copy your preferred files across sources

Complete your

WORKFLOW

TOP ↑

Complete **your workflow** with Kaleidoscope. Git, SVN, Mercurial, drag and drop, **it all works**.

Screenshots

Built-in integration

Supported file formats (among others)

Drag and drop files and launch comparisons from other apps. View grouped changes from Git, SVN, Mercurial, Bazaar, or Perforce in one **clear changeset**.

- ✓ A **hugely efficient** addition to anyone's toolkit
- ✓ Flexible interface with great drag and drop support
- ✓ Get a complete and **concise overview** in a changeset
- ✓ Integrate with a world of other tools!

PLAYS NICE

Kaleidoscope integrates perfectly with **Versions**, our award-winning Subversion client. **SourceTree** and **Tower** also integrate nicely. For everything else there is **ksdiff**, our built-in command-line tool.

FILES GALORE

Drag **a bunch of files** onto Kaleidoscope to compare them to each other. Make as many comparisons as you want, and switch between them in Kaleidoscope's **uncluttered** tabbed interface.

DETAILS

TOP ↑

GENERAL

- **Organized workflow**
One tab per comparison
- **Compare two+ files**
Add any number of files per tab
- **Always up to date**
Auto-refreshes when files change
- **File Shelf**
Quickly go from file to file
- **Path Bar**
See where your files are
- **Keyboard shortcuts**
Every action has a shortcut

TEXT SCOPE

- **Supports any text file**
