

Open New Doors

With Right-Sized Access Control

Don't compromise your accessibility.

Find your own path with access control that is designed to grow with you. **lite blue™** provides cost-effective access control in a solution that fits your needs and can be easily scaled. Designed for flexibility and expansion over time, lite blue is a web-based access control system that boasts the same intuitive software as our bright blue Intelligent Access Management System, allowing you to manage your system from any location with internet access. Including 2 onboard reader interfaces, **lite blue** supports up to 8 devices and can be easily upgraded as your system expands.

lite blue™. *Great things come in small packages.*
