

FREQUENTLY ASKED QUESTIONS

What is Agripaper?

The term "Agripaper" refers to paper being manufactured using an agricultural stock such as sugar cane bagasse, hemp etc.

Is Agripaper FSC Certified?

Yes, both Wheat Sheet and Sugar Sheet are FSC Certified.

Is the paper Recyclable?

Agripaper can be recycled in a blue bin just like any other paper and is compostable and biodegradable.

Where is Agripaper made?

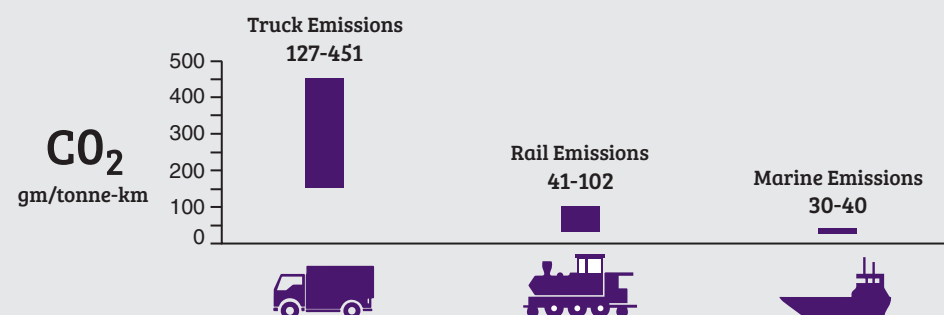

Wheat Sheet in particular is manufactured at the largest wheat paper production plant in Northern India. The cost of retrofitting Canadian mill equipment is significant – once we prove there is a demand, we plan to begin production in Canada.

Does Agripaper Impact the Food Chain?

No. The residue waste from the wheat straw and sugar cane to manufacture Agripaper is obtained after the farmers harvest the remainder of the plant used to produce food, which would otherwise be thrown away.

What About the Impact on the Environment?

The environmental impact from shipping has been shown to be less than the environmental impact of transporting goods and materials by truck or by rail, as seen by the following graph:

As a means of providing the most sustainable printing possible, Royal has partnered with Bullfrog Power to create **BC's Clean Power Printshop**. Through the use of audited clean energy certificates for wind electricity, all printing is now produced with clean power.

The logo above is on all our packaging and is your assurance that your printing was produced in our clean power facility.

MAKE A DECISION THAT YOU AND YOUR CUSTOMERS AGREE ON

AgriPaper provides an opportunity like no other paper. It serves as a visible reminder of your organization's commitment to sustainability and your community.

Here's how making the switch is a profitable business decision:

Sales: Provide a key value-added feature to your product or service by integrating the powerful common-ground value of sustainability into client discussions and proposals.

HR: Brand your business as an "Employer of Choice". Sustainable businesses hold a distinct advantage in retaining and recruiting talented professionals to grow their business.

Marketing: Incorporate sustainability into your value proposition in order to influence the buying decisions of consumers across all sectors.

Operations: Promote operational efficiency, employee pride and a green supply chain.

We invite you to consider the advantages of purchasing your printing on AgriPaper to support the integration of advanced sustainability within your organization.
