these challenges and turn them into opportunities. We build a wide array of products, from sub-assembly to complete manufacturing, and we continuously develop new and optimized services that support the full scope of our customers' most pressing needs. These new and expanded services span across all of our business units and include product design, materials science expertise, direct fulfillment and master data management.

With capabilities like these at our disposal, Jabil is a full-service and fiercely collaborative global supply chain and manufacturing solutions company. It's in that spirit that Jabil's Fulfillment & Distribution team works in hand-in-hand with the Supply Chain Management team to develop and provide the highest possible customer service levels at the best possible costs.

Jabil's Intelligent Supply Chain

Jabil's Intelligent Supply Chain team supports all Planning team and Supply Chain Management team functions and provides total landed cost analyses to support footprint and business placement decisions.

Innovative, Proactive and Differentiated Supply Chain Management

Market leaders in every industry and across all geographies rely on their global supply chains to drive competitive advantage and to keep pace with rapidly shifting market dynamics. Many companies struggle to get new products to market within the constraints of difficult cost structures, complex and diverse sectors and geographies, ever-shifting supply chains, turbulent economies and scarce resources. The accelerating pace of change within the digital economy places an even higher premium on increasing flexibility, agility and scalability while reducing costs and managing complexity within their supply chains.

Jabil offers the most advanced supply chain capabilities in the world. As a full-service and fiercely collaborative global supply chain and manufacturing company, Jabil enables digital supply chain solutions that enhance innovation, create growth opportunities, reduce risk, drive optimal cost, and deliver complete supply chain visibility. We have built an ecosystem of suppliers that scale to deftly meet the ever-changing needs of our customers and have developed analytics tools to track and capture data in real-time to provide visibility to reduce risk and sustainable cost leadership.

Our team of experts is known internationally for its operational excellence as we collaborate to design and implement intelligent digital supply chains that bring flexibility, security and speed to meet demanding deadlines. Jabil's Fulfillment & Distribution team partners closely with customers to keep up with every challenge and turn them into opportunities. They work hand-in-hand with the Supply Chain Management team to develop and provide the highest possible customer service levels at the best possible costs.

Jabil's Intelligent Supply Chain

Jabil's Intelligent Digital Supply Chain team supports all Planning team and Supply Chain Management team functions and provides total landed cost analyses to support footprint and business placement decisions.

Electronics Sourcing

Jabil manages its commodity portfolio at the global level. This consolidated spend leverage optimizes total cost consideration, supply chain flexibility, and delivers.

Logistics

Jabil provides customers with world-class supply chain network design and optimization solutions through its propriety, predictive activity-based simulation and optimization tools.

Supply Chain Architecture Models for Planning

Jabil's Supply Chain Solutions team supports all Supply Chain team functions in architecting, building and supporting processes and toolsets that enable and improve capabilities.

Equipment Manufacturers (OEMs) are the models. Original Design Manufacturers (ODMs) are the OEMs. There is considerable pressure on manufacturers to provide greater value and full-service manufacturing solutions. Jabil has responded to these rapid changes by enabling its customers to succeed with its Intelligent Digital Supply Chain (IDSC) solutions, actionable data analytics and more.

Jabil Overview

Innovation & Development

HOME > SOLUTIONS > INNOVATION & DEVELOPMENT CONSULTING

Radius is a [global innovation and development](#) consultancy firm. Due to our integrated manufacturing experience and capabilities, our model is purposefully designed to bridge the difficult gap between capturing and understanding consumer and market insights through to effective commercialization.

In studios around the world, teams of talented brand and product strategists, researchers, human factor specialists, designers, engineers, and quality and implementation professionals work together. Traditional functional silos are replaced with constant iteration, testing, and user touch points fully integrated to bridge and accelerate the right ideas to market, reduce risk, and maximize ROI.

Innovation. Realized.

It's our model. It's in our DNA. That's what makes us different. This is why the world's leading companies have trusted us for the last two decades to help them grow.
