these challenges and turn them into opportunities. We build a wide array of products, from sub-assembly to complete manufacturing, and we continuously develop new and optimized services that support the full scope of our customers' most pressing needs. These new and expanded services span across all of our business units and include product design, materials science expertise, direct fulfillment and master data management.

With capabilities like these at our disposal, Jabil is a full-service and fiercely collaborative global supply chain and manufacturing solutions company. It's in that spirit that Jabil's Fulfillment & Distribution team works in hand-in-hand with the Supply Chain Management team to develop and provide the highest possible customer service levels at the best possible costs.

Jabil's Intelligent Supply Chain

Jabil's Intelligent Supply Chain team supports all Planning team and Supply Chain Management team functions and provides total landed cost analyses to support footprint and business placement decisions.

Broad Market Expertise, Scale and Stability.

Since 1966, Jabil has offered – and continually innovated – the most advanced manufacturing technologies and supply chain management capabilities in the world. With locations in 28 countries, we've distinguished ourselves by adding a wide-range of solutions that make us the premier end-to-end, one-stop shop for delivering innovative products securely and timely. Our team of experts is known internationally for its operational excellence, and we work collaboratively to design and implement intelligent supply chains that bring flexibility, security and speed to meet demanding deadlines.

Jabil has expanded into a wide array of industries, ranging from automotive to consumer electronics to electric vehicles to smart power grids. Along the way, we've assembled an innovative team of engineers and supply chain experts whose industry-specific expertise and creative ingenuity helps Jabil solve some of the most challenging design and manufacturing problems in the world. We've also built systems and processes that enable our teams to leverage our collective capabilities and the convergence of technologies across all our industries, meaning every one of our customers benefits from the very best of what Jabil has to offer, across multiple sectors.
