these challenges and turn them into opportunities. We build a wide array of products, from sub-assembly to complete manufacturing, and we continuously develop new and optimized services that support the full scope of our customers' most pressing needs. These new and expanded services span across all of our business units and include product design, materials science expertise, direct fulfillment and master data management.

With capabilities like these at our disposal, Jabil is a full-service and fiercely collaborative global supply chain and manufacturing solutions company. It's in that spirit that Jabil's Fulfillment & Distribution team works in hand-in-hand with the Supply Chain Management team to develop and provide the highest possible customer service levels at the best possible costs.

Jabil's Intelligent Supply Chain

Jabil's Intelligent Supply Chain team supports all Planning team and Supply Chain Management team functions and provides total landed cost analyses to support footprint and business placement decisions.

Design Engineering

HOME > SOLUTIONS > DESIGN ENGINEERING SOLUTIONS

Automotive Design
By partnering with Jabil, customers can leverage Jabil's comprehensive design capabilities and deliver ingenious products swiftly to market.

Digital Home Design
Our customers are looking for next generation consumer and enterprise connected solutions and Jabil is leading the way with cost-optimized digital media and content security products.

Electrical Design Engineering
Jabil's product engineering design teams consists of the best and brightest delivering skill and design expertise in Electrical Engineering

Healthcare Design
Jabil's healthcare and packaging division – Nypro – partners with the world's most well known medical and pharmaceutical companies to design and optimize a wide array of healthcare products.

Industrial & Energy Design
Jabil leverages deep competencies in industrial controls and power electronics helping customers deliver innovative, dependable products swiftly

Mechanical Design Engineering
Jabil's mechanical engineers offer mechanical design solutions in metal and plastic enclosures, tooling, thermal architecture and more.

Mobility Design

Jabil offers best-in-class smartphone and mobile accessory product design solutions.

Networking, Storage & Telecommunications Design

Jabil utilizes deep innovative product design competencies in enterprise and infrastructure solutions.

Optical Engineering Design

Jabil's optical engineering team delivers complex, high efficiency opto-electronics modules for Healthcare, Automotive, Industrial and Digital Home sectors.

Power Electronics Design

Jabil's power electronics team fuels a diverse array of power control and conversion products with inventive methods of cost optimization and accelerated time-to-market.

Printing & Motion Control Design

Jabil's Printing and Motion Control team partner with industry leaders to create innovative motion, sensing, imaging and control solutions for advanced printing and robotics systems

Software Design Engineering

At Jabil, our innovative and experienced software engineers have deep product knowledge in areas such as BIOS customization and system architecture.

Value Engineering Design

Jabil's supports our customer's product engineering design requirements with a full suite of Value Analysis and Value Engineering services designed at optimization and cost reduction

Jabil Corporate Headquarters: Jabil Circuit 10560 Dr. Martin Luther King Jr. St. N, St. Petersburg, FL 33716, USA
