

Online or In-person Technical Training

SOLID is committed to educating the industry with the greatest clarity and simplicity. As an OEM, we want to ensure that every aspect of SOLiD's product and system is understood clearly by the people operating it. Our training content and methodologies are unique and go beyond what traditional programs offer.

SOLID's training programs are for anyone who sells, supports or designs in-building wireless systems using Distributed Antenna System (DAS) products from SOLiD. Our training team consists of some of the most experienced wireless experts in the industry. They share their knowledge through numerous training pathways and varying levels of complexity – all custom-tailored to your specific requirements.

On-Line Training:

SOLiD University is a unique online platform that combines ease of access with a self-paced curriculum – making it easier for you to schedule comprehensive technical and product training with your other professional obligations. Courses can be accessed from anywhere, on any device. Upon successful completion of the course(s), students are awarded certificates of

completion.

In-Person Training:

SOLiD experts can also provide in-person advanced product and technical training for you or your customers. Our curriculum has a comprehensive selection of topics that provide a high-level, in-depth education on today's most advanced wireless solutions. Our regional teams can schedule a session for you and/or your team at your convenience at your facility, and can customize

the training to your specific needs.

Contact either SOLiD Sales (<mailto:sales.team@solid.com>), SOLiD Sales Engineering (<mailto:se.team@solid.com>) or SOLiD Training (<mailto:training@solid.com>) teams to schedule any of these training options.
