

FLOORS

Floor Refinish Options

Over time, floors will often separate or show areas of color loss due to traffic wear patterns or sun fading. N-Hance renews the original shine and luster of all your wood surfaces, but without the dust, mess, odor and down-time typically associated with wood refinishing.

CLASSIC FLOOR REFINISH

N-Hance will make your hardwood floors beautiful again with our Classic Floor Refinish. The ideal "Classic Floor Refinish" job has some visible wear with light surface scratches. The finish is pretty much intact with no signs of bare wood. Separations between the boards are minimal and the entire floor requires minor touch-up, if any.

Before After

HAMMERED FLOOR REFINISH

The "Hammered Floor Refinish" is a little rougher with gray to black traffic areas that have really been worn down to the bare wood. The finish may be intact along the perimeter of the room, but the center of the floor is completely worn. Deep impressions and cross grain scratches are visible due to large dogs, children or moving furniture around, like a piano or refrigerator. Water damage may be present on this type of floor and separations between the boards run throughout the entire wood surface. With this type of floor, the technician needs to screen and fill the floor.

Before After

NON-SANDABLE FLOOR REFINISH

There are many floors that cannot be sanded such as cork, bamboo, some engineered floors and the increasingly popular hand-scraped or distressed floors. Even solid wood floors can only be sanded once or twice before it is down to the tongue and groove. Because the N-Hance process doesn't generally go down to the grain level, we can refinish all of these types of floors. N-Hance is your only solution for these types of popular floors.

Before After

Lightspeed®

The N-Hance process is more convenient and provides a healthier option for your family than traditional wood refinishing.

Our proprietary Lightspeed process of refinishing your cabinets, hardwood floors and luxury vinyl tile (LVT) requires no sanding, is non-toxic and has very little odor. Most jobs can be completed in half of the time as traditional refinishing or cabinet refacing. Lightspeed is a powerful ultraviolet (UV) light that works together with Lightspeed Plus to provide a professional and durable factory finish.

Lightspeed Plus is the top coat, used with the Lightspeed process. Lightspeed Plus™ is an antimicrobial UV finish that keeps homes healthier by reducing bacteria growth by 99%*. It effectively inhibits the growth of dangerous microbes such as E. Coli, Staph and harmful bacteria, keeping your family and home healthier for longer.

CLASSIC REFINISH

The Classic Cabinet Refinish job is a convenient and affordable way to bring out the beauty in your kitchen cabinets. The job gives your cabinets a clean, fresh look and repairs minimal wear on the wood surfaces. Grease and dirt are easily removed and touch-ups are performed quickly and timely. You will love the convenience, along with the shine and luster this service will bring to your tired cabinets. Items may be left in the cabinets and drawers without interfering with the work.

COLOR CHANGE

If you are wanting a new look in your kitchen, but money and down-time are a concern, N-Hance's Color Change may be just what you need. The Color Change on cabinets can involve slightly warming the tone of the wood or a much more dramatic effect like changing the color of the cabinets. The change can involve going from a golden oak to dark espresso or to clean white. Simply find any sample cabinet color or finish style and N-Hance can generally match.

We can help with all WOOD REFINISHING NEEDS

No matter what wood surface, you can depend on N-Hance to provide excellent Quality and Durability.

In addition to floors and cabinets, N-Hance can help with a variety of refinishing needs.

- Exterior Doors
- Interior Doors
- Interior Trim, Moldings, Casings
- Stair and Railing
- Built-Ins
- Furniture

The process and products used are similar to the cabinets and floors but tailored to provide an excellent, durable finish depending on your wood refinishing need.

For exterior surfaces, the products contain UV inhibitors to block from sun fading and other elements to extend the life of your finish. Products have fast dry times and low VOC's, as well as hundreds of colors to choose from.
