

PROTECTIVE COATINGS

Recently there has been a revolution detailing industry. The creation of permanent and semi-permanent coatings has changed the way people protect their vehicle's exterior surfaces. These products form a strong and durable layer of protection on many of your vehicles exterior surfaces. The depth, gloss, and protection that can be achieved with these products are truly astounding.

Only a hand

full of detailing companies across the country are professional enough to be selected to be an **Authorized Installer** of the finest coating products on the market today. Only these few **Authorized Installers** are able to purchase and apply this advanced technology. There is a rigorous screening process to ensure that only the best of the best are allowed to apply this product, and that the perfect barrier of protection is achieved every time.

We offer a wide variety of these products, so that you can choose the one that works best for you. If you have any question about which one would be best for your individual needs, please contact us and we can explain the differences to you.

OptiCoat Pro by Optimum »»
