

EN CANNABOOST Accelerator

CANNABOOST is a powerful bloom accelerator that stimulates the fructification. As a result the harvest will be fuller and denser than normal. The yield will be more homogeneous due to a gradual opening. Besides this CANNABOOST ensures your plants will become healthier, stronger and less prone to diseases and plagues. CANNABOOST stands surely for a higher yield, but also contains 8% of enhancing characteristics, which means CANNABOOST ensures a quantitative and qualitative better producer.

Directions of use

- Shake well before use
- Dosage
 - Administer CANNABOOST using a dilution of approximately 1:500 (20 ml per 10 L of water) from the moment that flowers start to form.
 - For extra flowering strength, dilute 1:200 (40 ml per 10 L of water)
- Do not use in combination with products containing hydrogen peroxide (H₂O₂)
- Use diluted solution within 7 days
- CANNABOOST can be given manually, through drip irrigation or by foliar feeding

Storage, health & safety and other directions

- Use CANNABOOST in combination with your regular feed
- Store closed in a dark and frost-proof place
- Keep out of reach of children
