

**HEALTHCARE
OVERVIEW**

Four Programs That Reduce Infections & Deliver Operational Efficiency

----- Predictive Infection Prevention -----

Each Program Brings Together Products, Information, Training & Service To Deliver Desired Outcomes

Benefits Of The **Operating Room Program**

Why Implement The Patient Room Program? To Improve Customer Outcomes

Elements Work Together To Deliver Outcomes

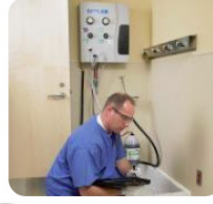

TECHNOLOGY

- Technology is the **foundation for your most desired outcomes**
- **Best-in-class disinfectants** simplify EVS operations and leave spaces cleaner and healthier
- Cleaning tools and systems that **enable reduction in product consumption and waste**

INFORMATION

- Information helps you **stay on top of all the key drivers of your outcomes**
- DAZO® monitoring provides insights to the **cleanliness of your HTO's**
- Customer Portal provides you visibility into **improving cleaning results and operational efficiency**; as well as **raise patient satisfaction**

SERVICE

- **Personally-delivered service** is the fulfillment of our promise as your partner
- **Baseline & ongoing audits to identify needs and opportunities for operational improvement**
- **Regular, scheduled preventive maintenance to ensure ongoing efficient operation**

TRAINING

- Our industry understanding and expertise provides you with **best-in-class training and onsite consultation**
- Personally delivered **hands-on training** at implementation and ongoing
- Best practice methods, and support materials, to **optimize team performance**

Why Implement The Central Sterile Program? To Improve Customer Outcomes

Why Implement The Hand Hygiene Program? To Improve Customer Outcomes

What Makes The Hand Hygiene Program Unique? Electronic Compliance Monitoring System

1. Patient is waiting to be treated by a nurse

2. Nurse enters the room and is wearing her badge

3. The bed kit creates a zone around the patient

4. The nurse must wash / sanitize before going in the patient zone to be compliant

5. The nurse must wash / sanitize after leaving patient zone

6. The hub integrates this information from the bed and dispenser

7. A dashboard is visible to managers at the hospital. Reports are generated, such as compliance by unit or function, and battery levels
