## CHROMA™ WALL

### HAND HOLDS INSTALLATION INSTRUCTIONS:

*(Please read all instructions thoroughly before starting to install hand holds.)*

1. Place hand hold over desired T-nut in Chroma Wall, lining up the hand hold with the hole in the Chroma Wall.
2. Insert the appropriate size and type of bolt through the hand hold and into the Chroma Wall.
3. Using an Allen Wrench, gently start threading the bolt into the T-nut. (Take care not to cross-thread the T-nuts.)
4. If you feel resistance while starting to thread the bolt, immediately stop, remove the bolt and readjust the hand hold and bolt angle.
5. When the bolt threads are started properly, continue threading the bolt until it becomes tight, then give another 3/4 of a turn. Do not overtighten hold.

### CARE AND MAINTENANCE OF HAND HOLDS

- ✓ Hand holds should be mounted according to installation instructions.
- ✓ Observe hand holds for signs of stress or breakage.
- ✓ Remove and replace any damaged hand holds.
- ✓ Check hand holds for looseness and tighten. Do not overtighten!
- ✓ Inspect climbing routes for unsafe maneuvers. Make sure all routes are reviewed carefully before they are climbed.
- ✓ Wash hand holds periodically to remove oils, stains and other residue. Use mild soap and water and a soft-bristle brush. Do not use a wire bristle brush. You can also wash hand holds in a dishwasher. Towel dry washed holds and then air dry for 24 hours to ensure complete drying.

### CLEANING OF CHROMA WALL

- ✓ The Chroma Wall can be wiped clean with a damp cloth and mild detergent.
- ✓ Refer to the included Safety, Care & Maintenance Manual for additional care and maintenance information.

**WARNING: THE PROPER CARE AND ONGOING MAINTENANCE OF YOUR CLIMBING WALL, INCLUDING HAND HOLDS, IS ESSENTIAL AND IS YOUR RESPONSIBILITY.**
