New research proves that coastal wetlands are among the best marine ecosystems to fight climate change. Will countries like the US rise to the challenge to preserve and restore coastal wetlands?

The 'Jewel of the Solar System', Saturn's rings have long inspired humanity's quest to explore outer space. Let's take a closer look at this exciting system.

The future of pain management is right around the corner, but in the meantime, our dependence on opiates is putting people at risk.

One year out from the announcement of Facebook's 10-Year Master Plan, let's take a look at what has come out, and what we are looking forward to.

As we struggle to feed our growing population, here is how the champions of technology are going to shape our food.

Around the world, vast quantities of magma lie in wait, prepared to wreak havoc. Near the famous volcano Vesuvius, another disaster looms.

Pulsars can be used study time, space, and more. They may even hold the key to navigation outside of our solar system.

Space is filled with noise; inaudible frequencies of radiation that carry the secrets of the universe. The question is, are they alien or are they natural?
