### EIM Accelerators Decrease Time-to-Value, Reduce Risk, Effort and Cost

Enterprise Information Management (EIM) refers to the SAP Information Steward and Data Services platform, as well as the PowerDesigner tool. These tools have many capabilities, all of which help determine if your data is clean, and if not, to help get your data clean, and implement processes to keep it clean. These tools, when licensed from SAP, provide certain pre-configured content or accelerators.

Utopia worked with SAP in developing some of those accelerators, each of which helps reduce your time to value and get projects done faster (such as data migration, data integration, data quality monitoring, master data governance and more).

Here are some of the Utopia accelerators:

- [SAP Information Steward \(IS\)](#)
- [SAP Data Services \(DS\)](#)
- [SAP PowerDesigner \(PD\)](#)
- [Utopia Auto-Designer](#)
- [Utopia Exception-Handler based on IS](#)
- [Utopia Data Migration Content Extension \(DMCE\)](#)
- [Utopia uDSP™ \(Data Services Pak\)](#)
- [MRO Repository](#)
- [Utopia Taxonomy for Materials and Spares](#)
- [Utopia Taxonomy for Equipment \(based on ISO-14224\)](#)

#### How Utopia Can Help

Utopia built its foundation in 2003 performing data cleansing projects. Shortly after that the SAP-Utopia strategic partnership was formed, we provided services to SAP customers in data migration, master data governance along with creating the SAP Solution Extensions for MDG for Enterprise Asset Management (EAM) and MDG for Retail & Fashion Management (RFM).

We can help you get your data clean, and enhance the data, so it helps you meet your business challenges of today and tomorrow. See our other services and products on how you can find out if your data is clean, and how to keep it at a high level of integrity.

#### Software Solutions

- SAP MDG for Enterprise Asset Management (EAM)
- SAP MDG for Retail & Fashion Management (RFM)
- EAM Workbench
- Utopia EIM Accelerators

#### Services
