
DETAILS

The breakthrough design of the Contact™ goggle makes it easy to adapt instantly to changing weather and light conditions. The Snapshot Magnetic Lens Interchange System sets a new standard in fast, accurate and secure lens interchange by utilizing a shutter-button release-and-locking mechanism. Self-locating magnets guide and hold the lens securely into place in this sleek, frameless design. The Contact offers an outstanding field of view and now includes two premium VIVID lens with Optics by ZEISS (one sun/all-conditions lens and one Infrared storm/low-light lens). New for 2018 the Contact now features EVAK™ Vent Technology for increased moisture management and vent foam durability. The Contact is a chameleon in any condition.
