Corey Goode is a model American family man, unbeknownst to his friends and family, Corey may hold keys that could open the doors to humanities future through unlocking the mysteries his past.

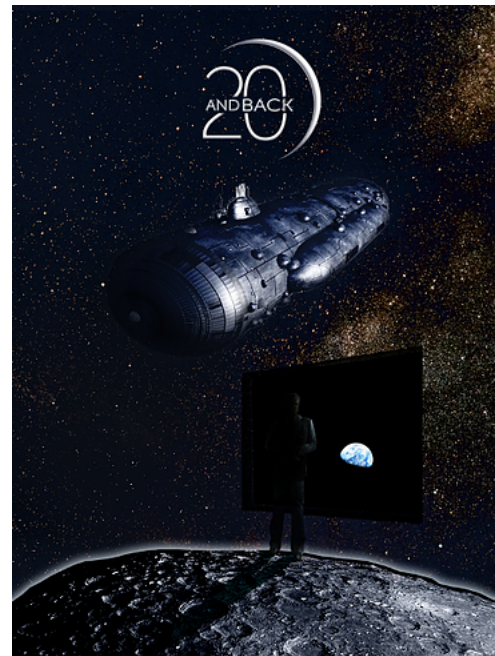

At the age of 6 years old Corey was brought into a Milab (Military Abduction) Program. This was part of a generational genetic experiment that started with his grandfather during WWII. It was through these ULTRA and Milab programs Corey and thousands of others were trained and drafted into a "20 and Back" tour of the Naval Secret Space Program (SSP) otherwise known as "Solar Warden".

For the next 20 years Corey served as a highly trained "Intuitive Empath" on an electro gravitic/ temporal torsion drive ship named "the Arnold Somerfield" before being age regressed and sent back in time to within a minute of when he left.

Blank slating is a term used within the SSP to describe the memory expungement technology administered to every draftee in in the "20 and Back" program. This procedure ensures the absolute sustained secrecy of these USAP programs and off world breakaway civilizations while also skirting Cosmic Laws of free will.

Shortly after Corey's discharge from the SSP the blank slating began to break down giving way to the partial recall of his 20 and Back. It would be nearly 20 years later after being admitted into surgery with the unexplained diagnosed of "Astronauts Eye" Corey would have an abrupt and traumatic recall of not only 1 but 3 "20 & Back" tours in the SSP.

Coreys story is now in the Pre Production Phase for a complete 11 Episode series, sign up and subscribe for updates on this amazing project.
