ASSET
HEALTH

ASSESS

ACT

COLLECT

Across industries, spanning OEMs & equipment types, DINGO connects to capture condition data

ASSESS

To create a Centralized Asset Health System to proactively identify issues

ACT

And deliver actionable intelligence to quickly return equipment to a normal operating state

RESOLVE

Issues & actions are tracked through resolution creating a cycle that continually keeps components in optimal condition

OUR SOLUTIONS:

TRAKKA® CONDITION MANAGEMENT SOFTWARE

Trakka is a cloud-based, predictive analytical and workflow management tool that distills data down to actions that drive results. This industry-leading system provides maintenance operations with an easy, cost-effective way to utilize condition data to maximize the health and operating life of assets.

CONDITION INTELLIGENCE™ EXPERT SERVICES

DINGO's Condition Intelligence experts have over 800 years of combined maintenance experience and manage over 100,000 vital components daily. Our team can help execute a condition management program that will increase asset availability and life.
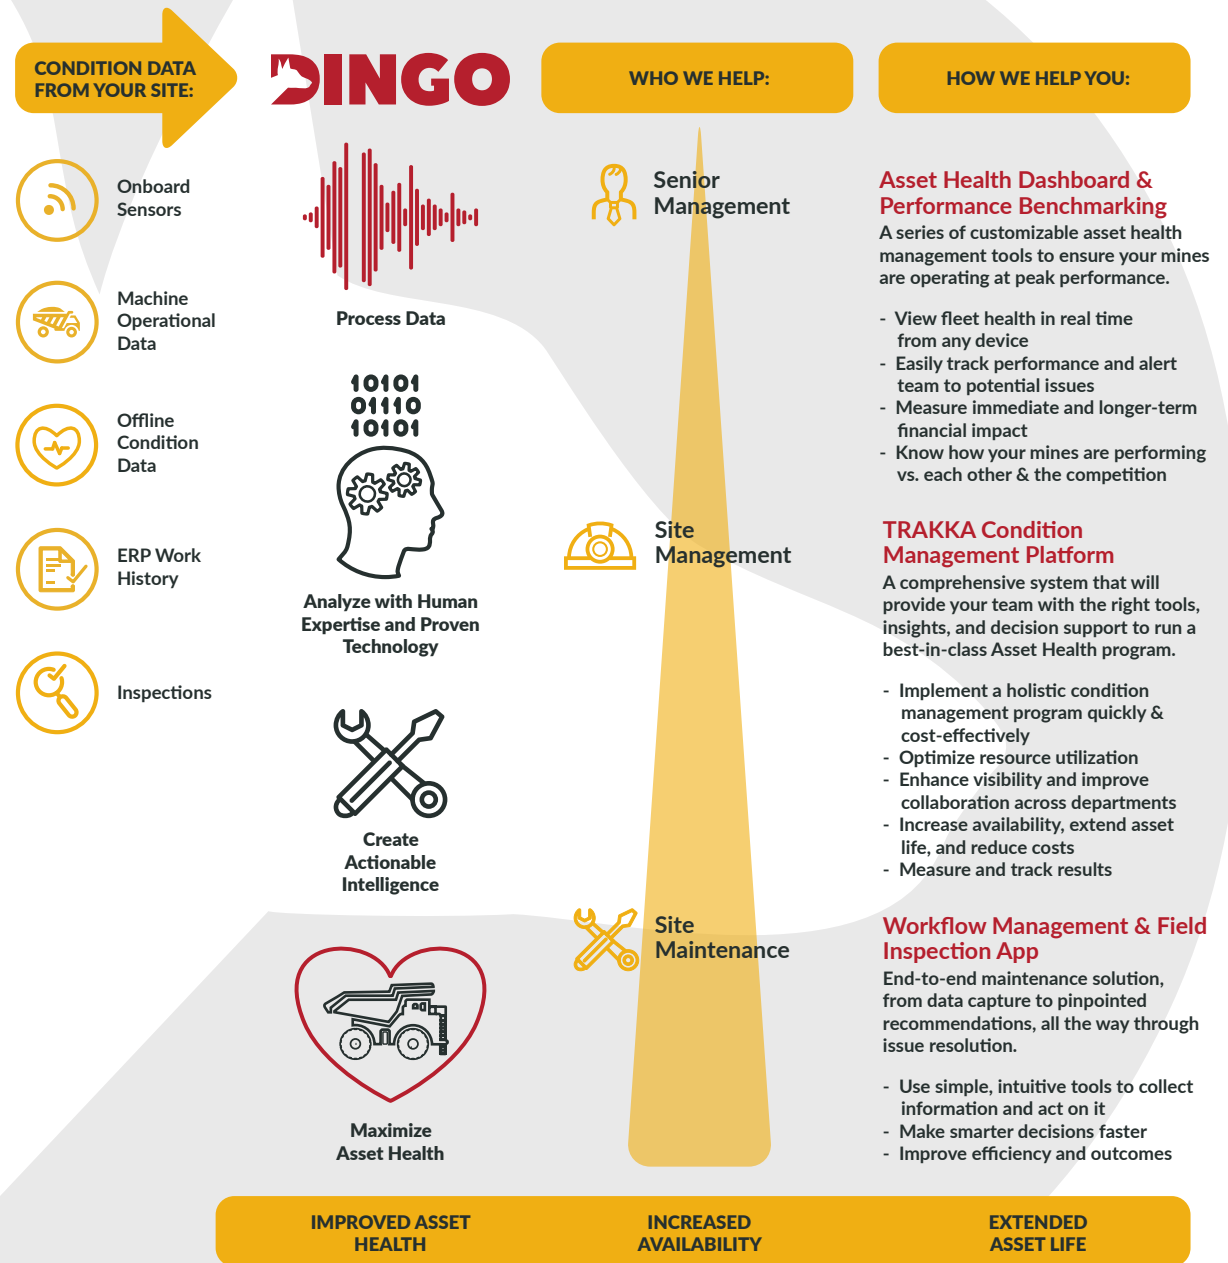

MANAGED SOLUTION

DINGO's maintenance experts work in partnership with your team to run your Condition Management program. From process integration to maintenance recommendations to daily program management, our team of experts has got you covered.

PROFESSIONAL SERVICES

Through custom consulting projects, opportunity assessments, and hands-on training programs, DINGO's experts can help you identify and eliminate the gaps between current maintenance practices and your targeted state.

WHOEVER YOU ARE, WHATEVER YOU NEED, DINGO IS HERE TO HELP.

See how our Condition Management System can help your organization succeed at every level.

CONDITION DATA FROM YOUR SITE:

- Onboard Sensors
- Machine Operational Data
- Offline Condition Data
- ERP Work History
- Inspections

DINGO

- Process Data
- Analyze with Human Expertise and Proven Technology
- Create Actionable Intelligence
- Maximize Asset Health

WHO WE HELP:

- Senior Management
- Site Management
- Site Maintenance

HOW WE HELP YOU:

Asset Health Dashboard & Performance Benchmarking

A series of customizable asset health management tools to ensure your mines are operating at peak performance.

- View fleet health in real time from any device
- Easily track performance and alert team to potential issues
- Measure immediate and longer-term financial impact
- Know how your mines are performing vs. each other & the competition

TRAKKA Condition Management Platform

A comprehensive system that will provide your team with the right tools, insights, and decision support to run a best-in-class Asset Health program.

- Implement a holistic condition management program quickly & cost-effectively
- Optimize resource utilization
- Enhance visibility and improve collaboration across departments
- Increase availability, extend asset life, and reduce costs
- Measure and track results

Workflow Management & Field Inspection App

End-to-end maintenance solution, from data capture to pinpointed recommendations, all the way through issue resolution.

- Use simple, intuitive tools to collect information and act on it
- Make smarter decisions faster
- Improve efficiency and outcomes

IMPROVED ASSET HEALTH   **INCREASED AVAILABILITY**   **EXTENDED ASSET LIFE**

DINGO
RUN SMARTER

Dear Bob:

Are you under pressure to **reduce maintenance costs…and to do more with less?**

With Dingo's Asset Intelligence solution, we can help your team decrease operating costs by extending the life of major components and increasing availability through the reduction of unplanned failures. Backed by 20 years of experience working with many of the world's leading mines, we have the tools and expertise to help you maximize efficiency with your existing resources.

Dingo's proven solution unites Trakka®, a predictive analytics engine and workflow management tool, with Condition Intelligence™, a team of experts dedicated to proactively identifying the work necessary to keep your assets healthy and your operations running smoothly. Our system also includes robust data tracking capabilities, customizable features such as alerts and dashboards, along with financial and KPI reporting to quantify the results.

If you'd like to learn more about Dingo's Asset Intelligence offering, please give me a call or visit dingo.com. I will also reach out to you in the next week or two to further discuss how Dingo can help meet your specific needs.

Sincerely,

Nick Reinking

Coal mine in British Columbia saves over $15 million through Komatsu wheel motor life extension.

Challenges:
- Running a reactive maintenance program
- Only achieving 13k hours of life on Komatsu 830E and 930E wheel motors
- Lack of benchmarking data to create informed wheel motor life targets

Results:
- ✓ Successfully transitioned to condition-based maintenance
- ✓ Increased wheel motor life by 104% over three years (67% in year one), from 13k to 27k hours
- ✓ Maintenance operation is now under budget and setting new production records

This mine is now a leader in the industry with a budgeted life of 30,000 hours for its Komatsu wheel motors.
