LYNX POLISHING

PADS

LYNX Resin Fiber Pads were made to increase production on concrete overlayment surfaces when an applicator is looking to polish or rejuvenate the floor with one system.

- LYNX Pads are available in grits of 50-3000.
- LYNX Pads are available in 7, 9, 11, 12, and 15"
- LYNX Pads can be run wet or dry.
- LYNX Pads are high density long life and made to hold up under the weight and RPM's of today's machines.
- LYNX Pads will produce a polished floor with high DOI and can bring the shine and reflectivity back to existing floors.
- They are designed to fit under the Diamatic BMG series of grinders as well as fitting other brands in the field.
- Production ranges from 10,000-20,000 sq. feet depending on grit and application.
- LYNX Pads are made to rejuvenate existing, new concrete slabs and polishing all types of overlay material.
- Uses a flexible Velcro pad holder with 3/8" of rubber underneath to allow the best possible contact with the floor.

2018 Year of the LYNX Promotion

- Buy LYNX Pads in 2018 and get rewarded 2.5%* of your purchases
- Free conversion plates with orders of \$5000 or more of any tooling combination, including special full round foam Velcro holder for increased flexibility.
- Available for DIAMATIC ULTRAPRO, SASE, HTC, HUSQY, CPS, and others.
