

Alexa Skills to Help You Learn

Bamboo Learning is an education-focused software and services company with a mission to teach using voice-based devices. It is focused on developing skills for Alexa that enable children and adults to have fun learning and practicing different subjects while listening and using their voice. Bamboo Skills automatically get more challenging as children and adults master different levels. Bamboo Skills also track progress and offer an option to receive results via email.

BAMBOO™ MUSIC ALEXA SKILL

Learn music theory with your Alexa device, whether you are taking music lessons, or just want to learn more about music.

- LISTEN to children's songs and classical pieces and complete exercises to learn about notes, instruments, scales, dynamics, chords, tempo, and intervals.
- ANSWER level 1 basic questions such as whether notes are going up or down. Advanced levels help you identify tempo: Allegro, Adagio, Moderato, and dynamics: Forte, Piano, Crescendo, and Diminuendo.
- EARN a Master Conductor Badge by identifying clarinet, harp, cymbals, cello, and other instruments.
- HAVE FUN competing with family and friends as you collect badges and move up to new levels.
