

## Who we are

With over 80 million downloads iTranslate is the leading translation and dictionary App. Our mission is to enable travellers, students, business professionals, employers and medical staff to read, write and speak in all languages, anywhere in the world.

The iTranslate Apps have been prominently featured many times in the International Press, various App Stores and in several television ads. Apple's COO Jeff Williams named iTranslate „One of my personal favourites“ at his keynote in the September 2015 Special Event, where he introduced the new watchOS 2.

2009

Born in 2009, iTranslate developed into a prominently featured App, from International Press to various App Stores and Television ads. iTranslate is headquartered in Austria/Europe

Team

Over time we have grown into an amazing team of highly talented people with hundreds of years experience in mobile engineering, machine and speech translation technology.
