## PREPARE.

Gain a clear understanding of your clients' needs and ensure thorough coverage by building daily inspection plans from detailed client account information.

[See How to Prepare](#)

plans from detailed client account information.

[See How to Prepare](#)

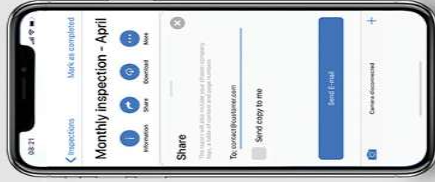

## INSPECT.

Avoid confusion and mislabeling by directly linking thermal images and multimeter or clamp meter data to the correct registered assets.

[See How to Inspect](#)

## DELIVER.

One-tap field reporting allows you to automatically create and upload reports to your private, secure FLIR InSite client portal, where customers can immediately access thermal images, reports, and other data.

## Description

FLIR InSite is the professional workflow management tool for electrical contractors and thermographers that streamlines the thermal inspection process and simplifies data collection and reporting.

With FLIR InSite, inspectors can prepare efficient survey routes, maintain accurate documentation by assigning thermal images and survey data directly to saved assets, share information with their team through the cloud, and file instant reports while still in the field. They can then share professional, detailed [more](#)

## What's New

Issues with inspections, camera connection, and handling of thermal images have been corrected. Inspected thermal images can now be downloaded from the web.
