# VACCI-GUARD™

## Protects and Stabilizes In-Line Vaccines.

Merrick's VACCI-GUARD is formulated to stabilize poultry vaccines in drinking water tanks or administered through in-line medicators.

VACCI-GUARD is the first and only milk based poultry vaccine stabilizer to be university tested. These tests prove VACCI-GUARD is an excellent vaccine stabilizer that outperforms milk powder when used to clear excess chlorine from in-line medicators or drinking water tanks.

VACCI-GUARD tests also determined the optimum milk ingredients and usage rate to maintain the highest titers in your poultry vaccines.

### GUARANTEED ANALYSIS

Crude Protein	Minimum	14.00%
Crude Fat	Minimum	0.50%
Crude Fiber	Maximum	0.15%

### INGREDIENTS

Animal Protein Products, Artificial Coloring (FD and CGreen No.3).

### MIXING INSTRUCTIONS

**DRINKING WATER TANK** - Mix 1 lb. (.45 kg) of VACCI-GUARD to each 25 gallons (100 liters) of water.

#### **IN-LINE MEDICATORS**

Mix 3 lbs. (1.4 kg) of VACCI-GUARD per gallon (3.8 liters) of stock solution if chlorine level is less than 1 ppm.

Mix 5 lbs. (2.3 kg) of VACCI-GUARD per gallon (3.8 liters) of stock solution if chlorine level is more than 3 ppm.

Set proportioner to meter 1 oz. (31 ml) of stock solution per gallon (3.8 liters) of water.

**PACKAGING:** Available in 1 lb. (.45 kg) individual packets, shipped in 25 lb. (11.33 kg) or 50 lb. (22.67 kg) bags.
