Before you see a specialist,  
let a specialist see you.

Every MRI tells a story.  
What is yours saying?

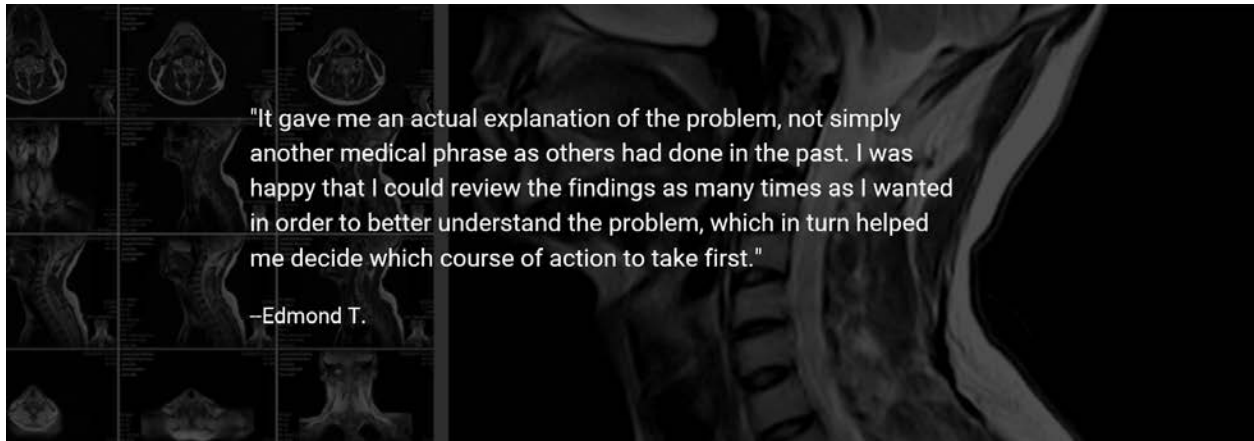

## Sitka's Advanced Guided MRI

An Advanced Guided MRI is a personalized one-on-one consultation with a board-certified musculoskeletal doctor. You'll receive a "guided tour" of your MRI – from a physician who makes it easy to follow – along with a look at your options and recommended next steps.

Our team of world-class experts explain your medical images in terms you can understand in a video you can watch on your phone. You'll learn what's wrong, what can be done to fix it and what you should do next. Watch the video as many times as you like, share it with your family, and make the decision that's best for you.

## Your MRI – Brought to Life

## Founding Team
