

## F.R. Screen Printing

### Wear it with Pride

Stand out from the crowd with something other than the traditional lime-yellow & orange sew-on lettering. As an NFPA 1971, 1977 Compliant, and UL Component Certified service provider – we can print and install your department's logo without affecting your warranty coverage.

We work directly with turnout distributors and manufacturers to dropship printed logos straight to the factory for installation during turnout manufacturing. Limiting the turnaround time and shipping for end-users.

Northwest Safety Clean is one of the only in the industry to offer UL Certified and fire retardant screen printing.

- Multi-color logos, up to 6 colors!
- Fire Retardant shoulder patches and back logos.
- Dye-Infused logos made with 3M's F.R. Reflective material to increase visibility.
- Certified to ANSI-ISEA 107 and CSA Z96 high visibility safety apparel standards.

**Customize** your bunker and wildland gear with our F.R. screen printed back logos and shoulder patches.
