AdjustaGrip 25 ft. Magnetic

For measuring when you need to measure, not fumble with your tape.

The AdjustaGrip™ Tape by BullyBag & Tool Company will attach to non-square surfaces, roof shingles, gutters, PVC, Conduit, and Pipe up to 2-inches in diameter. The tape measure features a double-sided large numbered 1-1/16-inch wide blade, and an exclusive rotating magnetic tip/claw. The large numbers are displayed on top and bottom for increased user readability. The magnetic tip can be used to attach to a metal surface such as a metal beam or window frame. The tape measure can easily clip onto your BullyBag, belt, or pocket and is compact enough to use every day.
