accenture

Turn process into profit

85% Reduction

4x Increase

80% Reduction

Process Cycle Time

Leverage faster processes to drive customer satisfaction and quicker time to market for new initiatives

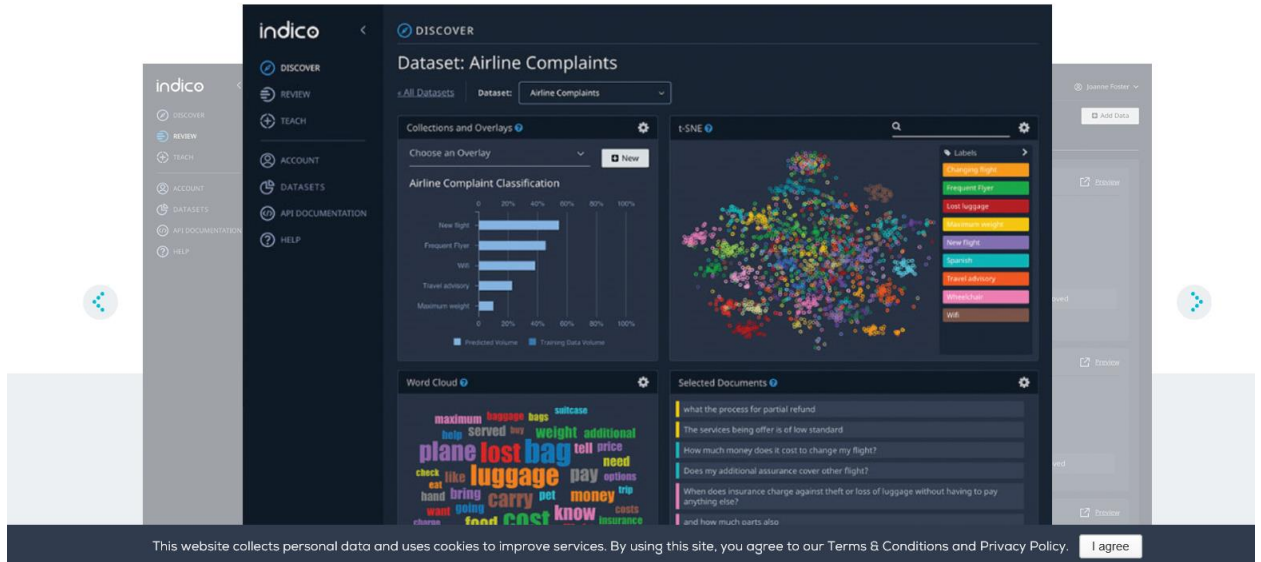

Process Capacity

Scale critical processes without increasing expense for more cost efficient back office functions

Resources Required

Free up critical resources to work on higher value-add projects rather than repetitive low-value tasks

Indico IPA

Small Data for Big Insights

Indico Enterprise AI delivers custom insights for your content from just a handful of examples.

Flexible Customization

Indico's "building block" approach means a solution for any process from the simple to the complex.

Flexible Deployment

Docker-based deployment supports all public clouds as well as on-premise/virtualized environments.

Purpose-Built for Unstructured Content

Combine text, documents and images to automate your business processes.

Ease of Integration

Comprehensive RESTful API's for integrating into any 3rd party application.

Expert Guidance and Support

Ready to guide your efforts and assist with use case identification and deployment best practices.
