CROSS-
INDUSTRY
DOMAINS

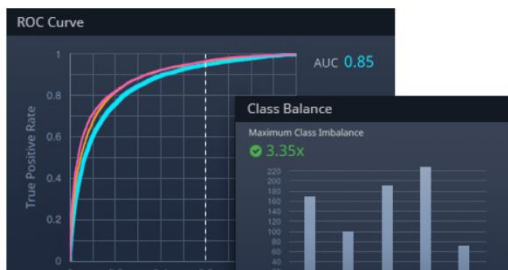

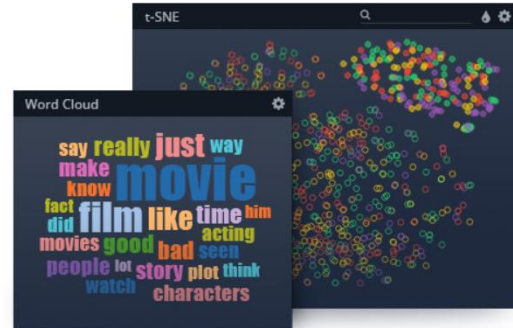

Support for scanned and native PDFs, MSWord, CSV and other unstructured content formats. Built-in OCR for scanned content support. Out of the box integrations with major content file systems including Box, Dropbox, GDrive, OneDrive and more.

Indico IPA Product Modules

Point and click creation of AI powered custom models for the analysis, classification and comparison of unstructured content

Indico Discover

- Comprehensive approach to unsupervised and semi-supervised text analysis
- Overlay with additional models (sentiment, keywords, etc.) for correlations
- Easy to explore new insights and signals and quickly convert them into new models

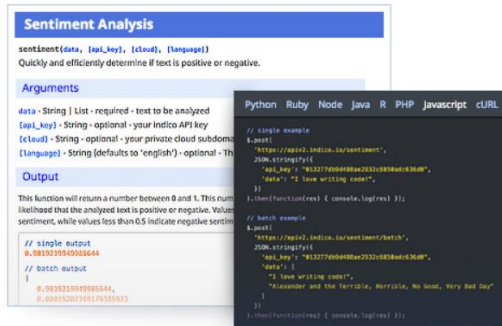

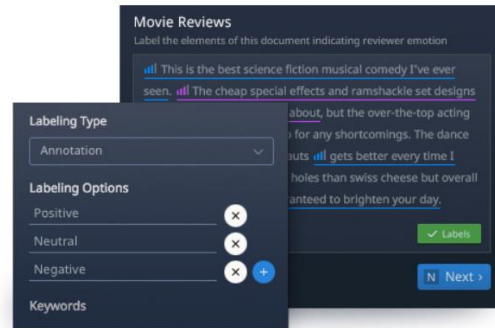

Indico Review

- Industry's first (and only) solution delivering tunability and explainability for machine learning in a point-and-click UI
- Easy testing and tuning of models by drilling into errors
- Comprehensive model performance analytics

Indico Teach

- Intuitive point-and-click interface for gathering input from subject matter experts
- Supports both classification and annotation
- Automatic predictions for determining when sufficient training has been achieved for a new model

Indico Enterprise AI APIs

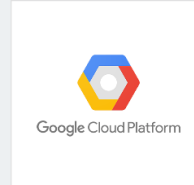

- Powerful runtime RESTful APIs for deploying your solution at scale
- Support across all major programming languages
- Comprehensive documentation for rapid onboarding
- Easily integrate with content sources and enterprise platforms

Implementation

Indico Enterprise AI is designed to provide our users with maximum flexibility in implementation and deployment.

Flexible Deployment Options for all Environments

- Indico SaaS – the fastest path to getting started
- Indico private cloud – host Indico on your cloud instance
- Indico on-prem – host Indico on your own hardware

indico

Enterprise AI solutions for automating business workflows that depend on unstructured content.
