SOLUTIONS

YOU DESIGN. WE CODE.

From CMS development, to digital marketing integration, to mobile apps, we expand your agency's ability to realize its vision.

INTRODUCING OSHYN WAVE

Wave boosts an agency's technical abilities at every stage of the life cycle. From discovery to design to implementation to past-launch maintenance, Oshyn has your back.

Planning Support

During the discovery and design phases, we validate feasibility, assist with scoping, and begin the technical architecture.

Iterative development

The core of our effort, we implement the project with client and agency buy-in at each iteration.

Post-Launch

Once a site is launched, we handle maintenance including bug fixes, feature adjustments, and infrastructure upkeep.

WE KNOW HOW TO WORK WITH AGENCIES

Oshyn was founded by former agency principals - and we have a long track
record partnering with agencies, so we understand how to collaborate on
successful projects.

LET'S WORK TOGETHER
