INVIEW 360° VEHICLE MONITORING SYSTEM

Eliminate blind spots. Improve pedestrian safety. Secure inventory.

The **inView 360™** provides the driver with a 360° view around the vehicle and a split screen view on the in-cab monitor. This unique view allows the driver to see pedestrians and obstacles in close proximity to vehicle. The second view on the display switches between front/driver side/curb side/rear views depending on the operation.
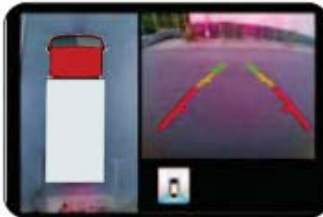

When paired with a digital video recorder, the forward-facing camera also captures video when an on-board recorder is triggered by events like speeding, rapid stops or acceleration, swerving or lane departure.

360° BIRD'S EYE VIEW

Front View

Rear View

Driver Side View

Curb Side View

Four ultra-wide camera angles are stitched together to provide drivers with a real-time bird's eye view of their vehicle.

7" DASH-MOUNTED MONITOR

The video feed is conveniently displayed to the driver on a 7 inch dash-mounted monitor.

inView 360° for Fleet Safety

Bird's Eye View

Eliminate blind spots with a 360 degree bird's eye view around the vehicle.

Four Camera Angles

Four ultra-wide camera angles on each side of the vehicle (front/curb side/driver side/rear). Optional driver-facing camera available.

7" Dash-Mounted Monitor

Displays split screen with bird's eye plus front/rear/side views.

No Driver Intervention

Views change automatically according to operation avoiding any driver distractions.
