

COMPANY

“We don’t just augment reality;
we augment human ability.”

Apprentice CEO and co-founder, Angelo Stracquatano talks about the future of augmented reality

Apprentice Core Values

We are developing a world in which multi-tech systems such as augmented reality, computer vision and machine learning are used to empower scientists, engineers and manufacturers who operate in various complex, compliance-driven environments. We create a synergistic relationship between man and technology, in which meaningful research, lifesaving product development and manufacturing are all executed with greater control, safety, productivity, stability and reliability.
