## Patient Focused TeleHealth LLC

Leveraging unique, highly effective and easily accessible medications to provide access for all

Know About Us

## Company Profile

Patient Focused Tele-Health, LLC (PFTH) was formed to create new and innovative solutions for areas of patient care within the human and pet markets. Leveraging unique, highly effective and easily accessible medications (Non-prescription /OTC products) is a key driver to provide access to care at the primary care and home levels, on a global scale. The launch of Tetracycline 3% ointment is a key product platform in improving outcomes for many people and pets.

PFTH has other non-prescription product platforms in our portfolio pipeline. We expect more product launches into late 2018 and early 2019.

Tetracycline 3% OINTMENT

## Our Product

Tetracycline HCL 3% ointment – First Aid ointment for cuts, scrapes and burns. A volume of ointment that should provide from 3 – 4 weeks of daily treatments.

### First aid ointment

At the first signs of signs of skin infection or inflammation, apply the Tetracycline 3% ointment.

It is always best to gently cleanse the area of concern prior to application of the Tetracycline 3% ointment.

### Cuts

Gently, wash with soap and water and then apply the Tetracycline 3% to the lesion and bandage. Repeat the application daily until resolution.

### scrapes

Gently, wash with soap and water and then apply the Tetracycline 3% to the lesion and bandage. Repeat the application daily until resolution.

### burns

Apply the Tetracycline 3 % ointment to the site of the burn. Re-apply every 12 hours and closely monitor the skins healing progression.
