What if instead of looking for information, it came to you instantly?

Sherpa uses powerful Artificial Intelligence Algorithms based on probabilistic models that predict the information that will interest you.

Raining? Sherpa will recommend that you grab your umbrella.  
Favorite team playing tonight? Receive results and updates in real time.  
Looking for a restaurant nearby? Sherpa's got it.

And the more you use it, the more it learns from you, by privately managing interactions, location services, and other series of inputs, in order to provide you with just what you want to know in that moment.

Sherpa will also let you know what's going on around you, no matter where you are.

Download Sherpa now and have everything you want and need to know right in the palm of your hand, without having to ask!
