

Our Products

PRIMO currently offers several of the industry's most popular residential and commercial roofing products. Primo residential products include Self-Adhered Underlayments, Synthetic Felt and Universal Shingle Starter Strip. In addition to Modified APP membranes, the PRIMO commercial line of products also includes Self-Adhered Base and Cap sheets.

These PRIMO products offer excellent protection against the elements of nature, whether it is the adverse winters of the Midwest & Northeast or the intense heat of the West coast & Southern states. PRIMO is reliable, durable and provides warranted products to give added peace of mind when adverse weather hits.

— PRIMO Self-Adhered Base Gritty

PRIMO SELF-ADHERED BASE/PLY SHEET GRITTY BLACK is a modified bitumen membrane designed for use in modified bitumen roof systems or with conventional roofing plies in a hybrid configuration. All Primo consists of woven fiberglass mat, impregnated and coated with Styrene-Butadiene-Styrene (SBS) SA (self-adhesive), modified bitumen. Also available in smooth.
