It's a well-known fact that our increasingly sedentary lifestyle, with little or no physical activity, can cause life-shortening conditions like obesity, diabetes, high blood pressure, and cardiovascular disease. The solution to the problem is simple, really: get up and start moving! And there's no better place for physical activity than in the great outdoors. Now we can't provide you with the motivation, but we can supply the gear. Whether you want to have fun on the water or in the mountains, ride a bike or paddle a kayak, have a fishing rod in your hand or carry a pack on your back, travel to exotic locales or just throw a ball around in the backyard, we have the outdoor & recreation equipment for all your open-air adventures.

#### Strong, Compact

Davis Instruments® - Telescoping Paddle

I keep two telescoping paddles in my PWC even though only one is required by law. Paddling a PWC to shore beats swimming it in! Most paddles are light weight and break easily. Even though they meet Coast Guard standards to prevent a ticket, they are not very reliable at getting you into shore. My life and my comfort are too important. I bought these because they are reliable and I trust them. A bit more expensive than some, but they are sturdy and durable.
