Simplify Pain Management with OPITOX®

The **OPITOX HOME DETOX KIT®** contains three beneficial products: a daytime tablet, a nighttime tablet, and a pain-relieving topical gel. The formulations and technology in the **OPITOX HOME DETOX KIT®** help simplify the dosing.

NON-ADDICTIVE PAIN MANAGEMENT

Millions of Americans are in pain. Some suffer from chronic headaches or back pain; others are recovering from surgery, sports injuries or accidents. Every year, millions of prescriptions are written for pain medications – many of them powerful opioids that can cause side effects and lead to addiction.

At Soba® we offer a non-opioid treatment, the **OPITOX HOME DETOX KIT®**. Our kit includes hemp-based products that can assist in the non-addictive treatment of pain.

*THE FUTURE OF
NON-ADDICTIVE
PAIN MANAGEMENT*

TABMELT® Sublingual Drug Delivery System

The non-toxic sublingual **TABMELT®** drug delivery system, featured in the **OPITOX HOME DETOX KIT®**, allows you to simply dissolve a tablet under your tongue for more instantaneous and accurate absorption than oral delivery with the possibility for less dosing and fewer side effects.*

TABMELT® optimizes cannabinoid delivery by offering a set-dose delivery system, enhancing bioavailability, and avoiding first-pass metabolism through the liver.

- Largely avoids liver first-pass metabolism
- Largely avoids chemically hostile and acidic GI environment delivery
- More precise dosing and delivery
- Avoids the possible carcinogenic effects of inhaling cannabinoids
- Non-toxic drug delivery system

NON-ADDICTIVE PAIN MANAGEMENT

THE IMPACT OF CBD

The **OPITOX HOME DETOX KIT®** includes hemp-based cannabinoid (CBD) products.

CBD is one of the compounds found in medical cannabis. With over 400 known chemical entities in the medical cannabis plant, 85 of them specific to cannabis, the medical cannabis plant offers numerous combinations for new drug applications. Some of the indications being studied with cannabinoids worldwide include:

Where can

Can CBD help?

- Epilepsy
- Pain Including Oncologic Pain
- Post-Traumatic Stress Disorder (PTSD)
- Opioid Addiction Therapy
- Traumatic Brain Injury (TBI)
- Concussion
- Chron's Disease
- Diabetic Neuropathy

Patient Testimonials

I'm absolutely blown away. In just a few days I went from looking up hospitals and psych wards to a smiling happy woman. It's absolutely amazing how much I've changed in such a short time.

My life has transformed so much in the past 7 days. I have been trying to get sober again for several months but I have never been able to get more than 3 or 4 days together (and those 3-4 days were mostly spent in bed sleeping).

When I was a teenager doctors put me on antidepressants and attention deficit disorder (ADD) medication. I've detoxed many many times the past few years and I've been to more rehabs than you can imagine. I've been off Vyvanse and Abvan for 8+ years now and can honestly say this has been the easiest and most amazing detox I've even been through.

Oct 14, 2018 I woke up in a state of panic. I had so much anxiety and felt so unstable that I almost checked myself into a hospital. I managed to make it through the day and when I woke up on Monday morning I was really sick (which I expected from my many detox experiences). I spent the day crying, throwing up and sleeping.

The following day I started taking the Opitox tabs. It first helped with my nausea and I was able to sleep through the night. When I woke up the next day I felt happier. I was able to get myself together and had a really great productive day. I started getting sick that night and took the tabs again and I've been taking them everyday since. I'm absolutely blown away by my transformation in just a few days. I've detoxed many times before and I'm shocked that I am feeling so great. I'm happier. I have NO anxiety, and my brain is not foggy like it is every time I stopped my ADD medications. It's not just me that sees the change, everyone who is close to me has seen it. I'm absolutely blown away. In just a few days I went from looking up hospitals and psych wards to a smiling happy woman. It's absolutely amazing how much I've changed in such a short time.

Patient Testimonials

"I was in a methadone program for seven years. After entering treatment and approaching 90 days. I was having a hard time and was still detoxing from the methadone and suboxone taper. I didn't think I could make it much longer. I started taking the Opitox® sublinguals and didn't think much of it at first, except that it did help with anxiety and sleep. A few days passed, and I realized I started feeling better—and next thing, I was fully detoxed with ease and another month had passed."

Brian E

"I am grateful I made the decision to take them, and I wish I would've have started on day one."

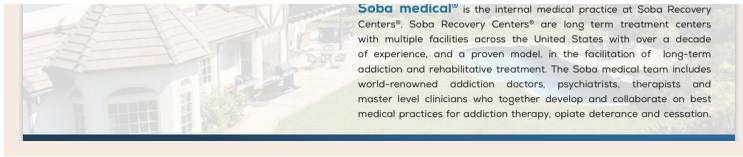

"A few days passed, and I realized I started feeling better... I was fully detoxed with ease, and another month had passed."

"I started taking the Opitox® sublinguals on the third day of my detox to help with still-lingering symptoms of pain, anxiety, and insomnia. I took one in the morning and one in the evening. While the symptoms of withdrawal were not totally erased, it did help them subside, which in return helped with my mental well-being. I am grateful I made the decision to take them and wish I would have started on day one."
