	Doggie Diary	✓

Know exactly what your dog is doing while you're away

Furbo detects and records video clips of important dog-related events. Learn what triggers your dog to bark, so you can distract her by tossing treats. Come home and find your pillow chewed up? Find out which one of your pups was the naughty one.

Be alerted of emergencies in real time

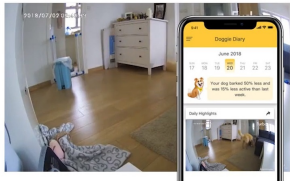

"Furbo saved my dog's life! My Aussie would've been sick eating 5oz of toxic dark chocolate." - Colleen, dog mom to Lala.

Unlike other cameras that send general sound and motion alerts, Furbo only notifies you of important dog-related events. Know when your dog needs you or misses you.

- Dog Activity Alert
- Dog Selfie Alert
- Person Alert

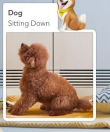

See the best of your dog's day in 60 seconds

Furbo captures adorable moments in your dog's day and creates a highlight video, saving you time from sifting through hours of video recordings.

Always Getting Smarter

Furbo's dog recognition technology is AI-powered, so it is always getting smarter. The more Furbo learns about your dog's patterns and behavior, the smarter it gets in notifying you of important events about your dog.

"Furbo saved my dog's life!"

Furbo lets me know my dog needed my help! I rushed home to take him to the vet.

-Kerry, dog mom to Harvey

Furbo saved my dog's life! My Aussie would've been sick eating 5oz of toxic dark chocolate.

-Colleen, dog mom to Lala

Furbo helps to keep my Manix alive! He has a condition that requires him to be active. I toss him a treat every 2 hours.

-Susan, dog mom to Marvin
