WE BUILD APPS

Pine Labs creates and uses technologies that integrate new user experiences. We do this by developing applications that let people address their practical needs, express themselves in new ways, or understand the world around them in different ways. These applications might be speculative in nature. Below is a list of some of the technologies we are looking to get people to try out and help us learn from.

OUR PRODUCTS

Dishlist.

Dishlist is a Los Angeles-based restaurant discovery app. Find, create, and share top 5 lists of your favorite dishes. We have everything from the best cheap tacos after a rough night to soufflé pancakes for brunch
