FACT

Your income as an adult is directly affected by what neighborhood, and even what city block, you grew up in. Even moving three blocks away as a kid makes a big difference.

SOURCE : OPPORTUNITY INSIGHTS

"A loving, thriving home is safe and stable. It's free of partner violence. Oppression is addressed. Equity is achieved."

COLSARIA HENDERSON  
EXECUTIVE DIRECTOR, COSA

Explore Community Fund

"With the birth of our first daughter, the question became even more clear: Why can't we point the promise of new technologies and fresh ideas, more squarely at the challenges that will shape the future for all of our kids?"

PRISCILLA CHAN  
CO-FOUNDER

FACT

There are roughly 37 trillion cells in the human body, but we don't yet know how many cell types. Once we do, we'll have a foundation for studying every human disease.

## Our Core Initiatives

Across three core Initiative focus areas—Science, Education, and Justice & Opportunity—we pair engineering with grantmaking, impact investing, policy work, and advocacy to help accelerate the pace of social progress.

**Education**

Every child should enter adulthood with the knowledge and skills they need to realize their full potential. We believe that a whole child approach to education is the most promising way to achieve this vision. We collaborate with students, educators, and families to create educational tools and experiences that effectively meet the holistic needs of every child.

[Learn More](#)

**Justice & Opportunity**

We're working to build a future that is more just, inclusive, and full of opportunity for everyone. We partner with organizations leading the fight on critical issues like criminal justice reform, housing affordability and access, and immigration.

[Learn More](#)

**Science**

Our goal is to support the science and technology that will make it possible to cure, prevent, or manage all diseases by the end of the century. We foster collaboration between scientists and engineers, develop new tools and technologies, and build support for basic scientific research.

HOW WE WORK:

# At the intersection of philanthropy, technology, and advocacy

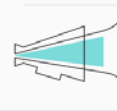

## Partnerships & Investments

Through grantmaking and our venture portfolio, we invest in bold ideas that have the potential to accelerate social change. Since our launch in 2015, CZI has awarded approximately \$1.4 billion in grants and made approximately \$100 million in venture investments.

## Technology

We are a new kind of philanthropy focused on engineering change at scale. Our engineering team partners with issue experts across our Education, Science, and Justice & Opportunity initiatives, to help bring technology to the table in new ways that drives solutions.

## Policy & Advocacy

We believe that lasting change is possible only with the support of community movements and the pursuit of meaningful policy change. Whether supporting community-led efforts to shape policies, or ballot measures and state legislative reforms, our policy and advocacy teams work hand-in-hand with those on the front lines of change-making.
