

Dedicated To Safety & Integrity

Our Ethos Pet Nutrition facility in Brownwood, Texas is a dream come true for us and a major chapter in our story—a story we're very proud of. We built a state of the art facility that puts safety and integrity first and where we can continue the research and development of our pet food formulas. Our Ethos facility includes an on-site lab that not only tests the ingredients we use and tests and holds the foods we are making on a daily basis, but also works to come up with more exciting ways to make great pet food.
