Transportation

Safe, reliable transportation solutions for all hazardous and non-hazardous wastes.

Clean Earth's nationwide transportation service makes removal of non-hazardous and hazardous wastes a hassle-free job. American Transportation Solutions (ATS), A Clean Earth Company, along with a fleet of pre-qualified independent haulers, includes a wide range of vehicles designed to seamlessly carry a broad range of materials from your site to our facilities with confidence.

In addition to full load transportation services, ATS, A Clean Earth Company, has RCRA 10-day hazardous waste transfer facilities located across the country, which service all 48 contiguous states. With multiple 10-day transfer locations, our customers can request non-hazardous and hazardous waste pickups of any size (partial or full loads) from anywhere in the United States. All locations accept both RCRA hazardous and non-hazardous wastes from various industries

hazardous waste transfer facilities located across the country, which service all 48 contiguous states. With multiple 10-day transfer locations, our customers can request non-hazardous and hazardous waste pickups of any size (partial or full loads) from anywhere in the United States. All locations accept both RCRA hazardous and non-hazardous wastes from various industries including energy, infrastructure, commercial, industrial, consumer commodities, medical, and pharmaceutical markets. Pickup service is available with empty drum delivery. Partial loads are consolidated into full truckloads for final shipment to one of Clean Earth's RCRA Part B permitted hazardous waste facilities. Customers may also transport their own material to any of these 10-day transfer locations.

All Clean Earth facilities are equipped with receiving docks and around the clock capabilities for receiving all manner of bulk waste delivery. In addition, Clean Earth can also receive van trailers or box trucks of containerized waste.

Bulk Receiving Capabilities include:

- End Dumps
- Roll Offs
- Vacuum Boxes
- Sludge Boxes
- Vacuum Tankers
- Tank Wagons
- Macro Boxes

- Macro Boxes
- Flat Beds

Clean Earth will provide uniform manifests for your project that can be used throughout our network of facilities. Manifests are uniquely numbered and include a place for your project's specific approval number. These two numbering systems work together to provide comprehensive tracking of every pound of material moved from your site to ours.

About American Transportation Solutions

American Transportation Solutions (ATS), A Clean Earth Company, services a wide variety of customers throughout North America. ATS currently has terminal locations in Pittsburgh, Pennsylvania, Calvert City, Kentucky, and Glencoe, Alabama. All drivers have extensive DOT training in the hazardous waste industry including but not limited to a 40-hour HAZWOPER course, in-depth security, defensive driving, labeling and load segregation, forklift, and PPE training. ATS drivers routinely assist customers in labeling, loading and placarding equipment. ATS routinely receives accolades from customers in all different markets based upon our driver's, dispatch, and transportation coordinator's performance and dedication to customer service. ATS has a central dispatch and load-planning office located in Seven Fields, Pennsylvania.

HOME > LABORATORY CHEMICAL PACKAGING

Laboratory Chemical Packaging

Our services and solutions are customized for maximum efficiency for our customers.

Clean Earth has the capability to handle a wide variety of lab packs at our hazardous waste facilities. We provide a unique full service approach to Laboratory Chemical Packaging (LAB PACKS). We provide both on-site services and technical assistance for our Self-Pack Program. Our highly trained team will manage your project from scoping through implementation, completion and followup. Our staff is ready to provide customized services and solutions to meet your hazardous and non-hazardous lab packing needs.

Our On-site Services include:

- Inventory Preparation
- Proper Packaging of all Hazard Classes

Disposal & Reuse
Environmental Support
Field Services
Soil Sampling, Site Management & Logistics
Laboratory Chemical Packaging
On-Site Hazardous Waste Management

Our On-site Services include:

- Inventory Preparation
- Proper Packaging of all Hazard Classes
- Paper Packing Chemicals
- Sampling and Analytical Testing
- Full and Customized Tracking and Labeling
- Chemical Inventory Reports
- High Hazard Handling - Reactives, Organic Peroxides
- Unknown Determinations and Chemical Classification
- Transportation

Our Self-Pack Program includes:

- Inventory Breakdown for Quoting
- Prepared Packing Slips with Packaging Instructions
- Approval Process for Your Submitted Packing Slips
- Technical Assistance for Packaging
- Transportation
- Packaging Supplies

HOME > HEALTHCARE WASTE

Healthcare Waste

Clean Earth offers several options for a customized waste disposal system and programs for the medical community.

Clean Earth offers tailored waste disposal systems and programs for the medical community, in which challenges are faced each day. Clean Earth will consult with you to identify the proper disposal needs of your facility by conducting a walk through audit of each medical location or specifically respond to those needs you identify. Then, we will create a compliant waste program for hazardous, universal, recyclable and regulated wastes offsite specifically customized for you.

Maintaining your facility compliance requires routine management of offsite wastes, regular facility inspections, satellite accumulation areas in strategic locations, and temporary storage within each facility to remain in compliance. Clean Earth will keep you in compliance.

- Aerosols
- Data Destruction
- Coal Combustion Products
- Construction Debris
- Consumer Commodities
- Contaminated Soil
- Dredged Material

Pharmacy

- Chemotherapy Drugs - Discarded or Outdated
- Pharmaceuticals - Listed in 40 CFR 261.33
- Solvents - Acetone, Alcohols, Phenols, Lindane
- Batteries - Alkaline, Lithium, Lead Acid, Ni-Cad (Cadmium)

Lab / Histology / Pathology

- Solvents from Tissue Processing, Xylene, Ethanol, Formalin >5%, Chemo Drugs, Lab Packs
- Acids - Sulfuric, Hydrochloric, Nitric, Acetic
- Mercury Containing Stains
- Gases and Cylinders
- Test Reagents Preserved in Thermoseal
- Fixatives w/Mercury Compounds
