SOURCING

Our team of recruiters utilize our proprietary Applicant Tracking System, local resources and national networks to identify and market to the most qualified candidates that meet your hiring needs.

SCREENING

Our trained recruiters talk with each candidate without discussing specific position details. This prevents candidates from tailoring responses & misrepresenting qualifications. We assess skill level, qualifications & career motivations to ensure long term success.

SELECTION

We select the right candidate based on comparison with dozens of alternatives saving client managers' time and increasing productivity. Our experienced compliance team mirrors your onboarding process to ensure our contractors meet your every hiring standard.

PAYROLL SOLUTIONS SKILLSETS

- ▶ Our Payrolling Program allows your businesses to select and screen your employees while still receiving the benefits of a staffing program. You select the employees and ProLink IT will become the employer of record. This solution allows you to add employees without adding to your full-time head count.
- ▶ Payroll Solutions is ideal for companies that want to:
 - ▶ Alleviate costs and concerns associated with employment (workers' compensation, unemployment, etc.), while receiving the skills and expertise that the IT professional brings to an organization.
 - ▶ Identify and then evaluate the individual before full-time hire.
 - ▶ Mitigate risk associated with independent contractors (1099 employees), part-time employees and internship programs.
 - ▶ Staff for project/contract-based work, utilizing experts such as former employees, retirees, consultants or specialists.

MANAGED SERVICES SKILLSETS

Managed Service Solutions – A web-based application that allows businesses to manage and procure staffing services. This includes temporary, permanent placement, as well as outside contract or contingent labor. Typical features of a VMS application include order distribution, consolidated billing and significant enhancements in reporting capability that outperforms manual systems and processes.
