MOVING PICTURES

Save effort, save towels, speed up drying time with the body blade.

Our Waterblade has found a strong popularity among horse owners and for the longest time we were happy to go with the flow and accept the kind words of praise. Then we got to thinking that, with a little help from our friends, we could develop a purpose built model that would be an indispensable tool for horse and livestock care. This is the result.

Built with a sturdy, ergonomically designed nylon handle as easy to operate with one hand as it is with two. This handle was designed specially for an easy grip that fits any size hand comfortably with no fatigue. Tough UV resistant nylon will provide years of service in your stable and out in the elements.

The patented Y-blade design has super fast flexing action that molds to your horse's body and whisks away water. Built with food grade silicone that is safe and comfortable so it doesn't irritate the animal or cause flinching. The 14" width makes short work of large areas while it's superior flexing ability allows it to work in tighter areas too.

Unlike rigid plastic and metal sweat scrapers, the Waterblade is perfectly safe around bony areas and will be your horse's favorite part of bath time. Silicone is naturally resistant to biological and microbial growth so germs and mildew are never a problem. Easy to keep clean and safe for nearly all chemicals and conditioners. Remains resilient in the most extreme temperatures.

Includes reusable storage pack, but most folk just drop it in their wash bucket or use the handy hangy-hole.
