## WHAT WE DO

Concierge service, excellent client care, and many years of experience serve as the foundational components in the J. Flowers Health Institute's Diagnostic Assessment program.

The Institute provides complete concierge care to busy executives who only have a short time to focus on their health, as well as individuals who want to concentrate on improving overall quality of life. Each J. Flowers Health Institute client receives 24-hour support and personalized care.

Central to the program is providing a space in which executives and individuals feel comfortable talking about their health and lifestyles. The Institute's team understands that, amid the stresses and pressures executives and individuals face every day, it is critical to provide comfort, support, and privacy in clinician-client communication.

The Institute benefits from access to the resources of one of the top medical centers in the world, offering access to health care specialists for assessments as well as health care aftercare plans to ensure ongoing health and wellness.

J. Flowers Health Institute is comprised of a team of doctors and professionals specializing in complete and comprehensive assessments for mental health, substance use disorder, chronic pain, and overall health and wellness.

We collaborate with expert providers from the Texas Medical Center, one of the top medical centers in the world, to provide a customized, five to fourteen-day itinerary of services, tests and exams personalized to specific needs.
