## About Huckleberry

Huckleberry offers workers' compensation insurance for small businesses, powered by technology.

### Mission

At Huckleberry, we're on a mission to make workers' comp work for small businesses. Over the last decade, technology has changed the way we run companies – from accounting, to tax preparation, to payment processing. But business owners are still forced to buy workers' comp insurance via an offline process that can take weeks to complete.

We want to change that by building an elegant workers' comp product that is simple, fast, and 100% online.
