Specifications

Replacement Parts

Similar to a functional DDU-100 series AED in form and operation, but all rubberized exterior surfaces are red, instead of black, to clearly distinguish the unit as a training device that cannot be used to defibrillate a real patient.

- Clear voice prompts and over-sized buttons
- Up to four AED trainers can be operated with just one remote control
- Battery pack should have a life of approximately 200 charge/discharge cycles
